PROGRAM APPROVAL

1. **PURPOSE:** To provide in-plant training for four Weather Package Technicians, Project CHALICE.

2. **Description of Work or Services Required:** Due to the complexity of the PC211 Radar, innumerable problems confront the present Air Weather Package Technicians in the field resulting in considerable "Out of Commission" in this particular area. Recent visits by GPL Technical Representatives to overseas detachments resulted in a strong recommendation that such training be accomplished in order to provide a Weather Package capability at these locations. Such training will require four to six weeks depending upon the background of individuals attending the course. This proposal represents training for two different classes consisting of two people in each class.

3. **Expected Additional or Related Work or Services:** There were no funds earmarked for this particular item in FY 60 Budget.

25X1　　4. **Total Estimated Cost:** [        ]

5. **Delivery Schedule and Period of Performance:** It is anticipated that this program will be completed this fiscal year depending upon the availability of Weather Package Technicians due to operational requirements in the field.

6. **Remarks:** This proposal was concured in by Acting Chief, DPD in priniciple by endorsement to a memorandum from Chief, Materiel Branch, DPD, dated 17 September 1959, subject: Personnel Justification for Additional Weather Equipment Technicians.
